Max Rodgers

303.656.1626 · max@realram.dev · github.com/gccdha

Math Software & Visualization / Programming / Proofs / Problem Solving
Project Planning / Communication / Research / Time Management

Technical Skills: C/C++, Python, Rust, Bash, Typescript, MongoDB, ChromaDB, NodeJS, Angular, Flask, FastAPI, LaTeX/Typst, CSS/HTML, Git, Docker, Linux, Nix, MPI, OpenMP

Education

University of Colorado Boulder — Boulder, CO
BA Computer Science, BA Mathematics, Minor Linguistics — Fall 2026 est.

Relevant Coursework: Principles of Programming Languages, Algorithms, Data Structures, Operating Systems, Cybersecurity, Abstract Algebra, High Performance Scientific Computing

Selected Acomplishments

Built Internal Training Platform | Internship Project — **2026**
- Collaborated with 7 other interns to design and build an internal training platform
- Developed platform using Angular, Typescript, FastAPI, and MongoDB
- Built an LLM assistant with retrieval-augmented generation (RAG) utilizing ChromaDB
- Designed role-based authorization system using Keycloak for single sign-on (SSO)
- Improved ease of deployment through Docker containerization

Built Program to Play Tak | Class Project — **2026**
- Designed a Python program to automatically play the abstract strategy game Tak
- Built interfaces to allow play against human or computer opponents
- Used alpha-beta pruning to efficiently determine good moves for any position

Solved and Expanded on 2022 Google Code Jam Problem | Paid Research Project — **2024**
- Collaborated with 3 fellow researchers to develop a solution to 2022 Google code jam
- Modeled the problem using linear algebra in order to construct a consistent solution
- Went beyond initial problem by generalizing the solution to a broader family of problems

Work Experience

Cognizant, Associate Intern — **Summer 2026**
CU Boulder Math Department, Undergraduate Researcher — **Summer 2024**
Posterity Health, Intern — **Summer 2023**
QDoba Mexican Eats, Team Member — **Summer 2022**
